

Joint CQSE and CASTS Seminar

Weekly Seminar
Jun. 12, 2015 (Friday)

TIME Jun. 12, 2015, 14:30 ~ 15:30
TITLE From Python to Jupyter
SPEAKER Prof. Yen-Lung Tsai
Department of Mathematical Sciences, National Chengchi
University
PLACE Rm716, CCMS & New Physics Building, NTU

Abstract

IPython Notebook provides a convenient, powerful, and interactive environment for scientific computation. Originally, IPython notebook is a front end for Python programming language, but researchers can use exactly the same environment to use different programming languages, such as Julia, R, and many more. In this talk, we briefly introduce Python language, and show various features of IPython Notebook, especially those related to scientific programming.
